Portfolio

EDUCATION

LDRP Institute of Technology and Research

Bachelor of Engineering in Computer Engineering (CGPA: 7.58)

Oct 2021 – May 2025

Gujarat, India

Skills

Languages: Python, SQL, C/C++, HTML, CSS, JavaScript

Databases: MySQL, PostgreSQL, MongoDB

Frameworks: Django, Django REST Framework, Flask, Streamlit

Libraries: OpenCV, Pandas, NumPy, Scikit-learn, Seaborn, Tensorflow

Tools: Git/GitHub, Jupyter Notebook, Postman

Work Experience

Data Science Intern, Prodigy InfoTech – [link](#)

1st Sept 2024 – 30th Sept 2024

- Designed and interpreted bar charts to highlight categorical and continuous features in the Titanic dataset; found 74% survival among women and children.
- Implemented decision tree classifier on Bank Marketing data with 85% accuracy; key predictors included job type and age.
- Analyzed public sentiment from social media, achieving 82% prediction accuracy on opinion shifts.
- Visualized traffic accident hotspots; revealed 70% due to poor road conditions and 60% occurring at night.

Projects

Expense Tracker Web Application using Django – [link](#)

Mar 2025

Python, Django, PostgreSQL, HTML, CSS, JS

- Designed and developed a full-stack expense management system with user authentication and CRUD functionality.
- Utilized PostgreSQL as the backend database for efficient data storage and retrieval.
- Implemented monthly and yearly expense summaries using Django ORM and query optimization.
- Built a responsive front-end with Bootstrap to ensure compatibility across devices.

Hand Gesture Recognition System – [link](#)

Dec 2024

Python, OpenCV, MediaPipe, Streamlit

- Developed a real-time hand gesture recognition system using Python, OpenCV, and MediaPipe, achieving 97% accuracy.
- Implemented custom ML classifiers for static and dynamic gestures, processing 19 3D landmarks at 30+ FPS. Created an interactive web interface using Streamlit for real-time parameter tuning and gesture training.
- Enabled gesture-based controls, optimizing performance for smooth real-time processing.

House Price Prediction – [link](#)

Aug 2024

Python, Flask, Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn

- Worked on a house price prediction system using Python, Flask, and Scikit-Learn, achieving 85%+ accuracy.
- Implemented various regression models and fine-tuned hyperparameters to optimize accuracy.
- Utilized Pandas, NumPy, and Seaborn for data pre-processing, feature engineering, and visualization.

Facial Recognition with Attendance System – [link](#)

Jan 2024

Python, Tkinter, OpenCV, MySQL

- Made a real-time face recognition system with 90%+ accuracy, leveraging OpenCV and the face recognition library.
- Used a Tkinter-based GUI for effortless user registration and image storage.
- Integrated MySQL database for attendance tracking, automatically logging timestamps. Optimized image processing to recognize faces in under 2 seconds.

Certificate

NPTEL Database Management System

Mar 2024

Secured **Elite Category** certification in Database Management Systems through NPTEL Exam.

Python And Django Framework For Beginners Complete Course - Udemy

May 2025

A comprehensive course on Python and Django, covering core programming, OOP, and full-stack web development.

HackerRank - SQL

Apr 2025

Achieved Verified Certification in SQL Basic, Intermediate and Advanced by HackerRank.
